removed.txt

Lynda,

In response to your questions regarding the Leviathan Mine database presented in your email below.

i. All data collected by Atlantic Richfield (validated/unvalidated/rejected) is included in the database. This is addressed in the main body of the text of the QAPP, in Sections 5.2.2 and 5.3.

ii. Data provided to Atlantic Richfield by other agencies has been included in the database; however, there is no set schedule for when other agencies, including U.S. EPA, provide data to Atlantic Richfield. Inclusion of data from other agencies in the database is addressed in Sections 3.7.1 (Acquisition of Non-Direct Measurement Data) and 3.7.2.3 (Data Storage and Retrieval) of the QAPP and in the Data Management Plan (Appendix C of the QAPP).

iii. Atlantic Richfield previously provided U.S. EPA with a listing of the data provided by other agencies and incorporated into the project database. That up-to-date listing was included in the QAPP Appendix C (Data Management Plan), Table C-1 which is also referenced in Sections 3.7.1 and 5.5.1 of the main body of the QAPP text.

Should you have any questions or comments, please contact Tony Brown at (714) 228-6770 or anthony.brown@bp.com.

Thanks,

Marc

Subject: RE: Leviathan Mine - October 2016 Monthly Progress Report

EPA is currently reviewing the June 30, 2016 Leviathan Mine Database and preparing comments.

Perhaps we could do a phone call to discuss broadly, but one of EPA's questions is regarding the completeness of the database.

Is all data, validated/unvalidated/rejected included; and what historical data and data collected from other agencies is captured? How often updated and how?

I note that one of the items in the ARC monthly states:

- *Continued updating the Leviathan Mine Project Database with data from Atlantic Richfield and various agencies.*

Could ARC please provide a couple paragraphs with specific references clarifying what agencies data are included in the one complete project database?

Best Regards,

Lynda Deschambault

Environmental Scientist

USEPA Region 09
